DETAILED ACTION

Response To Election

Examiner hereby acknowledges Applicant's election of claims 1-12 in correspondence dated 8/26/2003.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Holmberg.

Regarding claims 1 and 9-12, referencing Figures 1-6, Holmberg discloses a thin film transistor array panel (10) provided with a plurality of gate lines (34) formed on an insulating substrate (32); a gate insulating layer (60 and 62) formed on the gate lines; a semiconductor layer (64 and 66) formed on the gate insulating layer; a plurality of data lines (36) formed at least in part on the semiconductor layer; a plurality of drain electrodes (76) formed at least in part on the semiconductor layer; a plurality of pixel

electrodes (48) connected to the drain electrodes; and a plurality of conductive lines (12,22; 14,24; 16,26; and 18,28), each conductive line connected to one of the gate lines and the data lines and including first and second portions having different resistances. (Column 3, line 39 – Column 8, line 50.)

Regarding claim 2, referencing Figures 1-6, Holmberg further discloses that each conductive line includes a lower film (54) and an upper film (56) having resistivity lower than the lower film and the first portion of each conductive line does not include the upper film. (Column 7, lines 26-38.)

Regarding claim 3, referencing Figures 1-6, Holmberg further discloses providing a passivation layer (82) disposed between the data lines and the pixel electrodes.

Regarding claims 4-8, referencing Figures 1-6, Holmberg further discloses that the passivation layer has a plurality of contact holes (88) exposing the conductive lines, gate lines and the data lines. (Column 3, line 39 – Column 8, line 50.)

Relevant Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ha, Kim, Huang, Henley and Song et al. each disclose LCD devices.
